

## NXP enables you to streamline your RF design with leading RF EDA software.

*Now available, design kits of the NXP high performance RF small signal products*

NXP offers its RF small signal portfolio in leading RF Electronic Design Automation (EDA) software of: Ansoft Designer RF, AWR Microwave Office and Agilent Advanced Design System (ADS), including installation manuals, on the NXP web: [www.nxp.com/models](http://www.nxp.com/models)

To predict the behavior of a design by performing simulations, RF EDA software enables design engineers to reduce the number of design cycles, lower the risks and make better RF component choice for RF applications.
